SUMMARY

Third-year Computer Science student at Ho Chi Minh City University of Technology (HCMUT) with experience in building responsive web applications. Driven by a strong logical foundation, I am seeking an internship to deliver seamless user experiences. My long-term goal is to evolve into a Full-stack Developer.

EDUCATION

- **VNUHCM - Ho Chi Minh City University of Technology (HCMUT)** Ho Chi Minh City, Viet Nam
Computer Science, English-Taught Program September 2023 – Now
- **Le Hong Phong High School for The Gifted** Ho Chi Minh City, Viet Nam
Major in Mathematics September 2020 – May 2023

TECHNICAL SKILLS

Languages & Back-End: JavaScript (ES6+), Python, Node.js, FastAPI, Express.js
Front-End Technologies: React.js, Vite, Tailwind CSS, Framer Motion, HTML5/CSS3
Databases & Tools: SQLite3, MongoDB, Git, Figma, Jira

PROJECT

- **HCMUT Internship Filter - Chrome Extension** April 2026 - Present
 - Developed a functional browser extension that attracted 200+ active users within 5 days of launch, by utilizing JavaScript to automate vacancy filtering on student portals.

Technologies: JavaScript (ES6+), HTML5/CSS3, Chrome Web Extensions API

Source Code: [hoonz565/hcmut-internship-filter-extension](https://github.com/hoonz565/hcmut-internship-filter-extension)
- **Vietnamese Tuong Mask Archive - Digital Exhibition Platform** April 2026 - Present
 - Built a full-stack web gallery to display and serve 117 digital assets smoothly, by implementing a relational schema in SQLite3 and developing clean RESTful endpoints with FastAPI.
 - Created an interactive user interface with fluid transitions by engineering reusable front-end components using React.js, Tailwind CSS v4, and Framer Motion.

Technologies: React.js, FastAPI, SQLite3, Tailwind CSS v4, Framer Motion, Vercel
Live Demo: tuongvn.vercel.app
Source Code: [hoonz565/tuong-mask](https://github.com/hoonz565/tuong-mask)
- **FreelanceEDU - Educational Freelance Platform** November 2025 - January 2026
 - Delivered 3 core front-end modules (Jobspace, Applications, Reviews) on schedule within a 7-member team, by developing UI components in React and tracking weekly tasks via Jira.
 - Achieved reliable client-server data flow across integration points by connecting front-end views to RESTful APIs via Axios and following standard Git branching workflows.

Technologies: React 19, Vite, Tailwind CSS, Git, Jira
Source Code: [FreelanceEDU](#)

CERTIFICATIONS

- **IELTS - International English Language Testing System (Academic)**
Overall Band Score: [6.5](#) Issued June 2025
